Large Format Print File Requirements

Images for large format print jobs should be saved as Photoshop files, TIFF, or EPS, in RGB Colour Mode. If you are using InDesign or Illustrator, please make sure any special fonts or embedded objects are included with your files.

Pixel resolution of 300ppi (pixels per inch) is highly recommended. The minimum resolution recommended is 150ppi, however this will result in a lower quality print out.

For optimum output quality images should be scanned at a high resolution and reduced when you save the final image size
